SUBJECT:

1991 DIRECT MARKETING BUDGET & DATABASE NAME

GENERATION: REVISED

As discussed, the following provides the latest estimate of qualified names for the Direct Marketing Database expected by year-end 1991 and attached is the latest 1991 budget summary.

I. Qualified Names: Direct Marketing Database
Given the programs already in execution and recent decisions
by PM's Legal Department, the current database estimate for
the end of 1991 is 19.8 million qualified smokers. The
components of achieving this level is as follows:

| | PROJECT | QUALIFIED NAMES | COMMENTS |
|----|------------------------------|--------------------|---|
| N | ovember Database: | <u>18.9MM</u> | |
| D | uplicates | -148,319 | Duplicates will be removed from the Database. |
| | lorida Mailing estriction | -455,127 | No mail status of all smokers who do not have signature certifications and self-reported date-of-birth. |
| | otentially ndeliverables | +560,000 | This program began in early November. |
| | ame Generation hase I | +200,000 | Residual names from original program. |
| | ame Generation hase II | +300,000 | Second phase was circulated in magazines in the beginning of November. |
| В: | rand Programs | +100,000 | Qualified names expected from on-going brand programs. |

| | PROJECT | QUALIFIED NAMES | COMMENTS |
|------|----------|--------------------|--|
| List | Purchase | +325,000 | Qualified names expected from existing Select 'N Save & DataCap programs (200,000). Plus the purchase of an additional 125,000 signatured names from Select 'N Save (see Budget Summary). |

EXPECTED 1991 DATABASE = 19.8 MILLION SMOKERS

<u>Florida</u>

The total number of smokers who have been revised to "no mail" status in the state of Florida is 455,127. The detail is as follows:

| | | Smoker Count |
|----|---|------------------|
| 1. | Signatured with Self-Reported | 586,730eligible |
| | Date-of-Birth | |
| 2. | Signatured without Self-Reported Date-of-Birth | 21,007no mail |
| 3. | Grandfathered with Self-Reported Date-of-Birth | 205,545no mail |
| 4. | Grandfathered without Self-Reported Date-of-Birth | d 228,575no mail |

In order to "re-capture" these ineligible smokers, we are proposing to place these names into a 1992 Requalification Program to obtain signature certification and self-reported date-of-birth.

Based on current Requalifications Programs, we estimate the costs will be \$488,200 (not currently budgeted for in 1992) and should yield 136,538 net names (assuming a 30% success rate). In addition to the standard Requalification Programs, we would like to take the opportunity to test alternative creative (i.e. similar to male & female oriented programs discussed for 1992 Name Generation) to maximize the capture of smoker certification and date-of-birth.

Obviously, the learning achieved from testing alternative Requalification Programs in Florida will provide PM with significant insight into the implications (i.e. response rates, net names captured with signature and self-reported date-of-birth) of a national implementation of this policy: "Signature the Universe Project".

II. 1991 Budget Summary

As documented by the attached comparison between the original 1991 budget and actual expenditures incurred/committed for this year, we estimate a positive variance of \$1,028,700 at this time.

However, there are a number of new projects which will required funding including:

ADDITIONAL 1991 BUDGET EXPENDITURES

| Program | Cost | <u>Justification</u> |
|----------------|-----------|---|
| Select 'N Save | \$205,000 | Purchase approximately 125,000 signatured names. These names will be added to the Database in 1991. |
| Ron Weber | \$200,000 | Increase telemarketing efforts and next-day mail delivery of smoker certification (MCI) to obtain approximately 40,000 signatured names. While the program will occur this year, the names will not be available for the Database until First Quarter 1992. |
| Western Union | \$ 37,000 | To test an alternative to MCI's next-day mail delivery of smoker certification. The name recognition of Western Union may serve to significantly enhance the response to PM's telemarketing programs. |

ADDITIONAL 1991 BUDGET EXPENDITURES (Cont/d)

Cost

Justification

Promotional Fulfillment Vendor Review

\$ 50,000

LBCo. will review a number of Fulfillment Houses (including KGF's Promotional Services Center) to determine the qualifications of different suppliers. The end result of this study will provide PM with a list of qualified Fulfillment Houses in the event PSC is fully being utilized and unable to satisfy the requirements of a particular promotional program. Note, this 1991 expenditure represents the set-up costs for this project which will primarily be conducted next year.

Direct Marketing to the Retail Trade

\$200,000

Communicate upcoming promotional offers and/or new product introductions to retailers. Primary application is for Low Volume Accounts (less than 50 cpw) not serviced by PM Field Sales. Initially, will be tested in Region 5, specifically the State of California. The costs incurred in 1991 will include the purchase of business lists to create "retailer leads" (handled by MSA) and to develop creative options for mail-in surveys.

Telemarketing/ Monskey Names

\$270,000

Purchase names and mail smoker certification to obtain approximately 55,000 net new names. Program to be executed in 1991 but names will not be added to the Database until First Quarter 1992. Jim Spector December 5, 1991 Page 5

Summary of Additional Expenditures

• Total Incremental Expenditures: \$ 962,000

Available Budget: \$1,028,700

• Estimated Positive Variance: 66,700

Jim, we believe this covers the latest status on the Direct Marketing Database and the 1991 budget. Upon your approval, we will proceed with the incremental projects as outlined above.
